Master Lock®

TOUGH UNDER FIRE

Commercial Security Products Catalog

Custom Built.
Commercial Quality.
Complete Security.

Electronic Update February, 2015

The #1 Source for Portable Security Products

Recognized as the authentic, enduring name in padlocks and security products, Master Lock® has set the standard for quality and selection for more than 90 years.

Building on this tradition, Master Lock has greatly expanded its commercial product line, especially for safety lockout and high security applications. Today, there are many good reasons to specify Master Lock padlocks for your applications:

The broadest line: Master Lock offers a full line of products for virtually any commercial, institutional and industrial security and safety application.

Superior product quality: All Master Lock products are built with the unmatched strength and durability that you've come to know and trust. Each lock is individually tested to ensure years of trouble-free operation, dependable performance and peace of mind.

Controlled key security: Allows you to establish a safe, secure and convenient locking system. Master Lock stands alone among padlock suppliers in (a) designing security into the padlock's cylinder and operating key, and (b) providing key and installation database security management services as needed to assure the utmost in system integrity.

Unmatched sales support: Service and consultation is available to you both through our broad network of distributors as well as Master Lock's experienced sales organization.

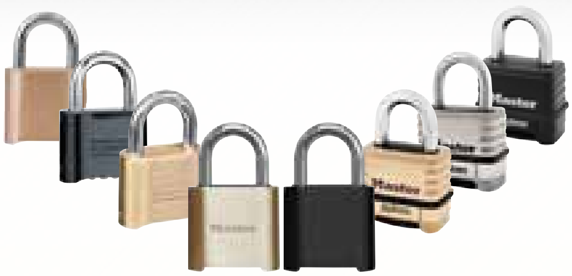

Personal service: Our inside customer service group stands ready to provide assistance to your call.

Prompt delivery to you: Direct from our stocking distributors, or alternatively, through one of Master Lock's ISO-9001 certified facilities; our stock product distribution center or special product 'Make-to-Order' factory.

You can trust Master Lock for the products, security, support and service you need.

For more information, call us today at 1-800-308-9244 (1-800-227-9599 in Canada), or visit our web site at www.masterlock.com

Padlock Keying Security

Keying Security is Equally Important to Physical Security in Commercial Security Applications.

Keying security includes both (a) the security designed into the padlock's cylinder and operating key, and (b) the way in which the product is supplied to the marketplace. Master Lock stands alone among padlock suppliers in both categories of keying security:

- Master Lock provides the largest range of tight-tolerance cylinders and keys that vastly eliminate unwanted key interchange. This will better ensure that one employee's key will not be able to inadvertently open a second lock.
- Master Lock offers key control services, charted and reserved systems all of which assure that your company's padlocking system maintains the utmost in key integrity, even as you reorder padlocks year-after-year. This means that additional padlocks ordered can all be specified to operate by distinct keys, if that is your requirement.

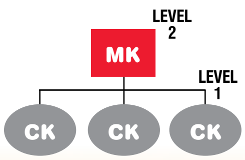

Establishing an Optimal Padlock Security System

Evaluate Your Present & Future Needs:

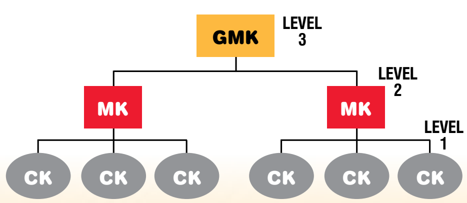

- Do you want each padlock to have a different operating key? Specify Keyed-Different (KD) padlocks.
- Do you want groups of padlocks to be opened by a single key? If so, order Keyed-Alike (KA) padlocks. For example, it is often desirable for each employee to have his own set of keyed-alike locks.
- Do you want a supervisor to be able to open a range of keyed-different padlocks? Order Master Keyed (MK) locks. See "Master Keying" section for more information.
- How many padlocks will you need? If you require thousands of distinct operating keys, with no repeats, you will want to specify a Master Lock commercial security padlock with a 5-pin or 6-pin cylinder. See "Key System Capacity" for more information.
- Do you want your padlock to be opened by the same key that opens your door lock? You can!

Master Keying

Master Keyed (MK) locks have to be ordered as such initially. Locks are not automatically pre-set so that a master key can later operate them. When you initiate a master keyed lock system, you should also identify how large and complex the system might eventually become.

This chart illustrates a simple MK system, wherein a single master key will open any of several keyed-different change keys (CK).

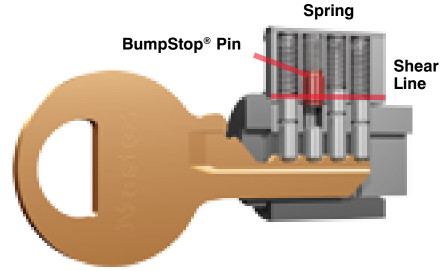

Many MK systems provide additional levels of control, as diagrammed here. The Level 3 grand master key (GMK), held by the Security Director, would open all locks throughout the system.

Lock Bumping Solution

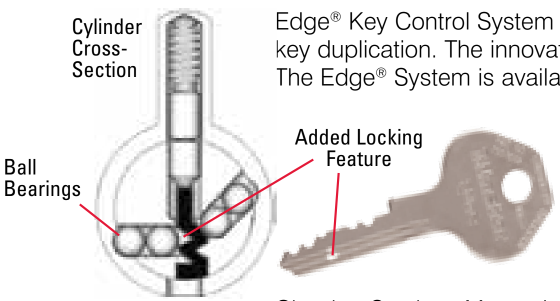

Advanced Cylinder Technology

Lock bumping has become a recognized method of violating most in-line pin tumbler cylinders. In response, Master Lock Company stepped forward to create a revolutionary new lock cylinder that provides unsurpassed protection against lock bumping, exceeding the highest Grade 6 criteria for bump resistance established in the ASTM Standard F883-09. Our BumpStop® solution employs an innovative, patent pending design which utilizes a unique reserve rake tapered driver pin, high performance springs, and precision tolerance chambers. During a bump attempt, this solution prevents the transfer of force from the bump key to the pins and blocks rotation of the cylinder – so the lock stays locked. This feature is available in a broad range of Master Lock padlocks and door hardware and can be ordered by adding an "N" to the product number. Example: 6121N (vs. 6121), 3N (vs. 3).

Master Lock Cylinder Cross-section

Key Control Options

Edge® Key Control System This patented system provides absolute key control, eliminating the risk of unauthorized key duplication. The innovative and exclusive cylinder design has an additional locking feature to increase security. The Edge® System is available in the full range of Master Lock Commercial Laminated and ProSeries® padlocks.

Restricted Keyways Key blanks are not sold. Cut keys are only available from the factory for charted systems. Master Lock maintains Restricted Key Systems specifically for Safety Lockout Padlocks, where safeguarding employee safety is the absolute priority.

Reserved Keyways The factory limits key blank distribution to specific customers. Cut keys are not readily available. Master Lock offers Reserved Key Systems (RSV) for its complete ProSeries® and Laminated product lines for commercial applications.

Edge® Key Control

Charting Services Master Lock will keep a complete record of the progressive key codes assigned and manufactured into a customer's padlocks for each order. Request this special service to receive a Commercial User ID number to reference on all subsequent orders. Any order submitted with the Commercial User ID will be manufactured to comply with the facility's key system requirements.

Matching Your Security Door Lock Keys

The versatile ProSeries® line can also be ordered to operate with the same keys used in your current door security system. This can greatly increase convenience (fewer keys to carry) and security (padlocks operate with the same high security, controlled keys). ProSeries® can integrate with door security systems from Schlage®, Yale®, Kwikset®, Corbin®, Weiser®, Sargent®, Russwin® and Weslock®; even Interchangeable Core keyways by Best®, Arrow™ and Falcon®...many popular keyways available!

Key System Capacity

All cylinders have limits to the number of change keys that can be provided. Be aware that whenever KD padlocks are supplied from open stock, the possibility exists that two or more locks provided will have the same operating key. This possibility of overlap increases as additional non-charted (see Charting Service) stock orders are received. It is important to know the key change limits of the padlocks you are considering for your security system. If the supplier does not, or can not, provide this information, the integrity of your keying system may be suspect.

This chart identifies the change key ranges of standard BumpStop® technology padlock cylinders.

Padlock Series	Model Numbers	# of Key Changes in KD system	# of Key Changes in MK system
Edge® 6 Pin	WP6 in Master Lock	90,000	6,000
Edge® 4 Pin	WP4 in Master Lock	1,200	140
ProSeries® 6 Pin	6100's, 6300's, 6800's, 7000's	90,000	10,100
ProSeries® 5 Pin	6100's, 6300's, 6800's, 7000's	14,200	1,300
Safety Lockout	410, 411	40,000	140
5 Pin Laminated Pin Tumbler	15, 17, 21, 24, 31, 81 & others	14,200	1,300
4 Pin Laminated Pin Tumbler	1, 2, 3, 4, 5, 6 & others	1,200	248
Small 4 Pin Laminated Pin Tumbler	7, 8 & others	800	160

Quantities listed in the last two columns are actual quantities of keys available.
Mathematically there are many more keys that can be calculated but may have been eliminated because they are undesirable or create a mechanical limitation. For additional models and key change information, contact Master Lock Company Customer Care.

Consulting & Support

Master Lock's customer service staff and field sales representatives are qualified and ready to help you establish a safe and convenient padlock security system for your company. Call or visit the Master Lock web site to get started on the path to effective keying security.

ProSeries® High Security

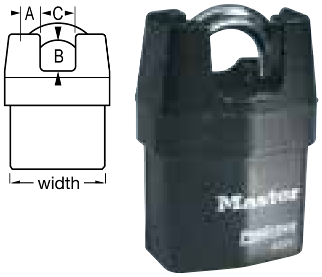

- Greatest physical security available:
  - Heavy steel bodies
  - Hardened steel and boron alloy shackles for superior cut resistance
  - Dual deadbolt locking for extreme resistance to prying
- High key security:
  - 5-pin tumbler ProSeries® cylinders provide tens of thousands of key changes
  - Special spool pins are virtually impossible to pick
- Rekeyable - replaceable cylinder and shackle

Solid Iron Shroud

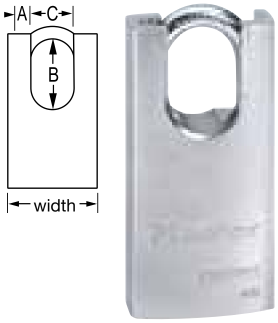

- Greatest security against bolt cutters
- Proprietary rustproofing for longer life
- Defeats attempts to pry and cut

ProSeries® All Weather

- For extreme conditions and corrosive environments
- Hardened steel and boron alloy shackles for superior cut resistance
- Dual deadbolt locking for extreme resistance to prying
- High key security:
  - 5-pin tumbler ProSeries® cylinders provide tens of thousands of key changes
  - Special spool pins are virtually impossible to pick
- Rekeyable - replaceable cylinder and shackle

Weather Tough®

- Exclusive cover protects lock from water, ice, dirt and grime
- Heavy steel bodies withstand physical attacks
- Keyway cover keeps out dust and dirt

Recodable Locks

- Rekey locks in seconds, as often as needed
- Match your recodable padlock to your Master Lock Grade 3 Residential, Master Lock Recodable door hardware, or door hardware with Kwikset® keyway for security and convenience – carry just one key

7053

Master Lock Model#	Description	Vertical Shackle Clearance (B)
7053	2 in. (50mm) w. Solid Steel Body, Recodable. Shackle Dim.: A: 3/8 in. (10mm) C: 1 in. (25mm)	1-1/2 in. (38mm)

Shackle Options:	LJ = 2-1/2 in. (63mm)

Rekeyable Products

- Rekeyable padlocks allow you to quickly remove old cylinder and either change the pins or replace the cylinder
- 5-pin cylinder standard for all rekeyable padlocks
- Save money and replace cylinders instead of locks
- Rekeying kit contains an extensive assortment of the most frequently used components to replace or rekey cylinders (including ProSeries® locks)
- Extra reach lock (no. 101) is ideal for wide-span applications; e.g. commercial refrigerators

General Security Non-Rekeyables

General Security

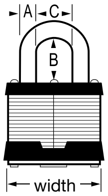

- Reinforced laminated lock bodies
- Double locking mechanisms provide extra pry resistance (1-1/8 in. bodies are single-locking)
- Pin tumbler key security: 4 and 5-pin cylinders
  - Master keyed and reserved systems available
  - Thousands of key changes

Laminated Steel

- For perimeter & storefront gates, tool cribs, construction equipment, vending & truck doors, general use
- Hardened steel and alloy shackles for extra cut resistance (1-1/8 in. body shackles are not hardened)
- Proprietary rustproofing for longer life
- Full range of sizes to best secure your applications

Resettable Combination

- Use combination reset feature to restrict/change allowed access
- 4-digit direct dial operation – reset to any of 10,000 combinations (Nos. 878 & 975 require no reset tool)
- Solid case for strength and weatherability
- Heavy hardened shackle provides high resistance to cutting and prying
- No.176 with key override feature for supervisory access
- No. 878 & 975 feature dead locking mechanism to protect against prying, shimming & rap attacks

Multi-User Series
Built-In Mechanical Lock

- Intuitive, easy-to-use design
- Set-your-own 3-digit combination
- Retains current combination until re-set
- Sleek design with satin finish
- Designed for multiple use in a day for high customer turnover facilities
- Eliminates distribution, tracking and management of keys, combination or locks
- Concealed mounting and rugged zinc case
- Override key allows quick supervisory access

Master Lock Model #	Description
3630	Set-Your-Own combination lock - For standard lift handle lockers - manual deadbolt locking, right-hand hinged door - override key sold separately
3631	Set-Your-Own combination lock - For standard lift handle lockers - manual deadbolt locking, left-hand hinged door - override key sold separately
3670	Set-Your-Own combination lock - For lift handle, turn handle and single point latch/box horizontal latch lockers - manual deadbolt locking, right-hand or left-hand hinged door - Override Key sold separately

K3630	Supervisory override key

www.masterlock.com/multiuser

How It Works

1. Spin the Dials to Personalized 3-Digit Combination
2. Turn the Knob to the Icon
3. Scramble the Dials

3630

3670

Wrap-Around-Latch™ Built-In Combination and Key Operated Locks

- Uses the same technology as an automotive door lock system, utilizing slam shut operation combined with a rotating latch that wraps around the latch plate
- Designed for single point latch lockers
- Provides the most robust design and requires the least adjustment for proper operation

Patent no. 7.984.630

1690

Lock Lubricant with PTFE

- The ideal lubricant for multiple lock applications including: padlocks, door locks, automotive, marine and multipurpose applications
- PTFE formulation cleans the lock components while lubricating and leaves behind a protective shield against dust, dirt, salt, moisture and other corrosive materials
- Excellent for locks used within a wide temperature range and will help de-ice pre-lubricated locks
- Lubricant helps maintain lock performance and increases the life of your security products
